

STONEBRIDGE WOMEN'S CLUB

TREX® COMMUNITY RECYCLING CHALLENGE NEWS June 2022

Great News! Thanks to the overwhelming response of our residents to the Women's Club Trex Recycling Challenge, we have reached our initial goal of collecting 500 pounds of plastic and have earned one Trex bench for our community. Since the start of this program in March 2022, an astounding 700 pounds of plastic film has been deposited in the Trex recycling containers located in the Clubhouse kitchen.

Please continue to gather dry, clean, clear plastic film through September 30 because our goal has now been expanded to collect a total of 1,000 pounds. If this target is achieved, we may apply to Trex to manufacture a second high-performance bench from recycled materials for all Stonebridge residents to enjoy!

Thank you for your continued participation in this worthwhile project, which is helping to preserve our environment while serving to enhance our wonderful community. Your unwavering support is appreciated!
